

DILSHAN CHAMILA

Software Engineer Intern

kdchamiladesilva@gmail.com | +94 77 2252056 | [dcdsilva.dev](#) | [LinkedIn](#) | [GitHub](#)

SUMMARY

Software Engineering undergraduate with hands-on experience in full-stack, mobile, and AI/ML development. Proficient in the MERN stack, Next.js, Python, React Native, REST APIs, and TensorFlow. Demonstrated ability to architect and deploy end-to-end applications, integrate AI services, and lead small development teams. Seeking a Software Engineer Intern role to contribute to impactful, production-grade software.

EDUCATION

BSc (Hons) Software Engineering
Sabaragamuwa University of Sri Lanka

2023 – Present (Expected 2027)
Current GPA: 3.32 / 4.00

SKILLS & TECHNOLOGIES

- **Languages:** JavaScript, TypeScript, Python, HTML5, CSS3
- **Frontend:** React.js, Next.js, Tailwind CSS, React Native (Expo)
- **Backend:** Node.js, Express.js, REST APIs, PHP, Laravel
- **Databases:** PostgreSQL, MongoDB, MySQL
- **AI / ML:** TensorFlow, OpenCV, Machine Learning, Deep Learning
- **Version Control:** Git, GitHub
- **Cloud & Tools:** Google Cloud, Firebase, Postman, VS Code, IntelliJ IDEA, Jupyter Notebook
- **Project Management:** Jira, Agile

PROJECTS

InterviewGenie: AI-Powered Interview Assistant (*Group Project*) [Live Demo](#) [GitHub](#)

- Engineered an AI-powered mock interview platform using Gemini AI (~1K token-based requests) to generate questions and deliver instant feedback across multiple sessions.
- Built a full-stack application using Next.js and Node.js, supporting 10+ interview sessions; integrated Gemini AI for automated question generation; enforced secure authentication for multi-user access.
- Configured Next.js server-side rendering (SSR) for 3+ core pages, reducing initial load latency and improving responsiveness for concurrent users across varying network conditions.
- **Tech Stack:** *Next.js, React, Node.js, PostgreSQL, Drizzle ORM, Tailwind CSS, Gemini AI*

ATM Guard AI: Real-Time Surveillance System (*Group Project*) [Live Demo](#) [GitHub](#)

- Led a team of 2 members and implemented AI/ML models using TensorFlow and OpenCV, achieving ~80% accuracy; developed a backend processing system for continuous data handling; created a monitoring dashboard for user interaction.
- Designed an AI-powered surveillance system for ATM security, training on 1,000+ images with data augmentation, achieving ~80% accuracy in threat detection.
- Developed 4+ Express.js API endpoints to bridge the Python ML pipeline with the React.js dashboard, delivering real-time threat alerts with under 1-second response latency during live surveillance.
- **Tech Stack:** *TensorFlow, OpenCV, Python, Node.js, Express.js, React.js, MongoDB*

Premier Scales Site (*Client Project*) [GitHub](#)

- Delivered a full-stack platform managing 100+ repair, billing, and certification records with secure role-based access.
- Architected a comprehensive full-stack solution supporting 3+ user roles and multiple operations, including repair tracking, billing, and certificate management.
- Deployed the application to Google Cloud with environment-based configuration and cloud-hosted static assets, enabling production-ready remote access and cutting manual administrative overhead by ~50%.

- **Tech Stack:** *React, Node.js, PostgreSQL, Express.js, Tailwind CSS, Google Cloud, JWT/RBAC*

GlowCart – E-Commerce Platform (*Ongoing Project*)

[GitHub](#)

- Designing an end-to-end MERN stack application; building 5+ REST APIs for product, user, and order management; implementing secure authentication and authorization; creating a responsive UI for multiple devices; integrating cart and checkout functionality for live transactions.
- Building a scalable MERN-based e-commerce platform supporting 50+ products with cart and authentication features.
- Implemented cart state management using React Context API, enabling real-time quantity updates, automatic price recalculation, and persistent cart data across 2+ user roles without page reload.
- **Tech Stack:** *MongoDB, Express.js, React.js, Node.js, Tailwind CSS, JWT/RBAC*

CERTIFICATIONS

- **Introduction to Generative AI** | Google Cloud Skills Boost – 03/2025 [🔗](#)
- **Web Development** | Sololearn – 03/2025 [🔗](#)
- **Python for Everyone** | Udemy – 01/2026 [🔗](#)
- **Python for AI & Machine Learning** | Udemy – 01/2026 [🔗](#)

EXTRACURRICULAR ACTIVITIES & LEADERSHIP

- Announcing Crew Member | TECHTALK v1.0 | Society of Computer Science, SUSL [🔗](#)
- Knowledge Team Member | Hope 1.0 | IEEE WIE Student Branch Affinity Group, SUSL [🔗](#)
- Announcer | Announcing Circle, Sabaragamuwa University of Sri Lanka [🔗](#)

AWARDS & RECOGNITION

- Semi-Finalist | Hackventure Competition 1.0 – Team-based national hackathon [🔗](#)
